

Setting up users on Windows

You should have 6 screenshots after completing this document.

Instructions:

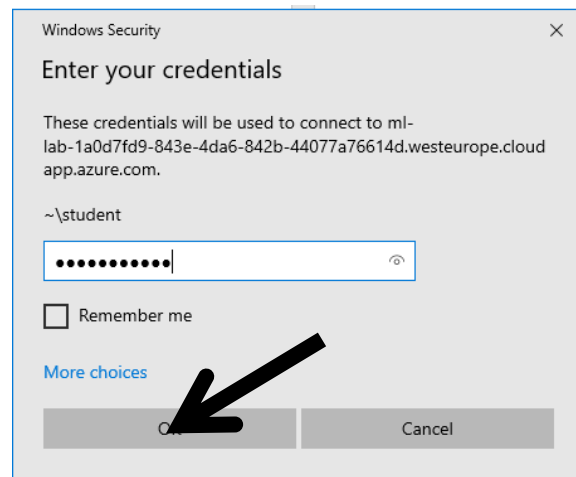

1. Log in to your Azure labs account. Ensure you have set up active directory as outlined in class. Details are on moodle
2. Open a word document to save your screen shots.
3. This walkthrough gives details of how to set up a user and a user group .
4. Please complete all steps on this worksheet and save your work.

Step 1:

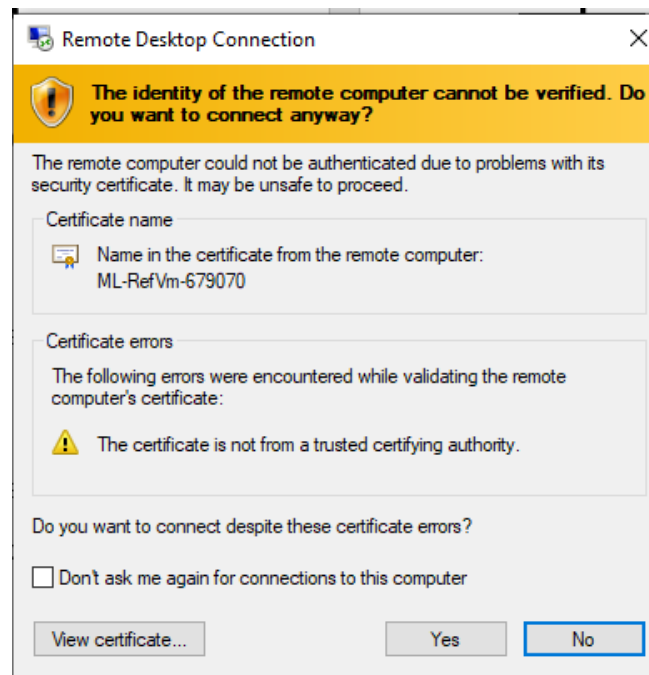

1. Setting up a user

1.1. Log into your azure labs account

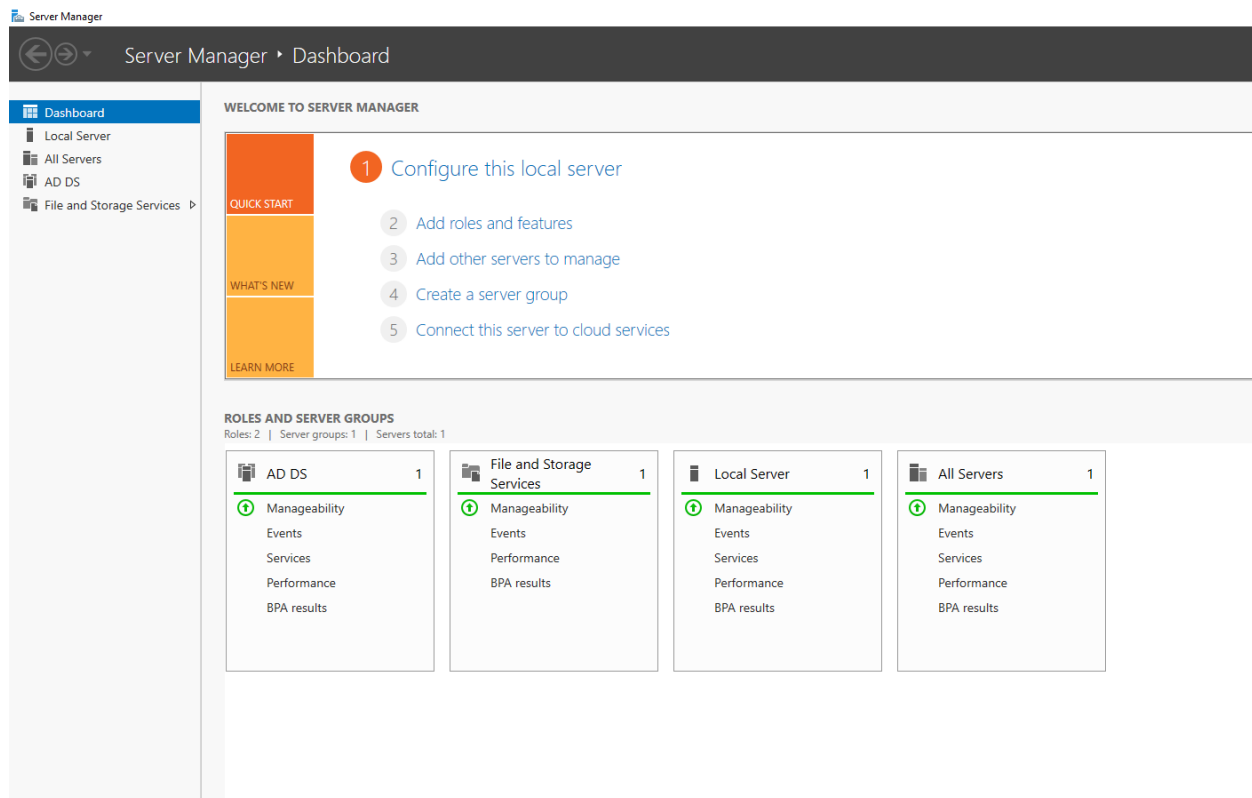

Student123! is the password

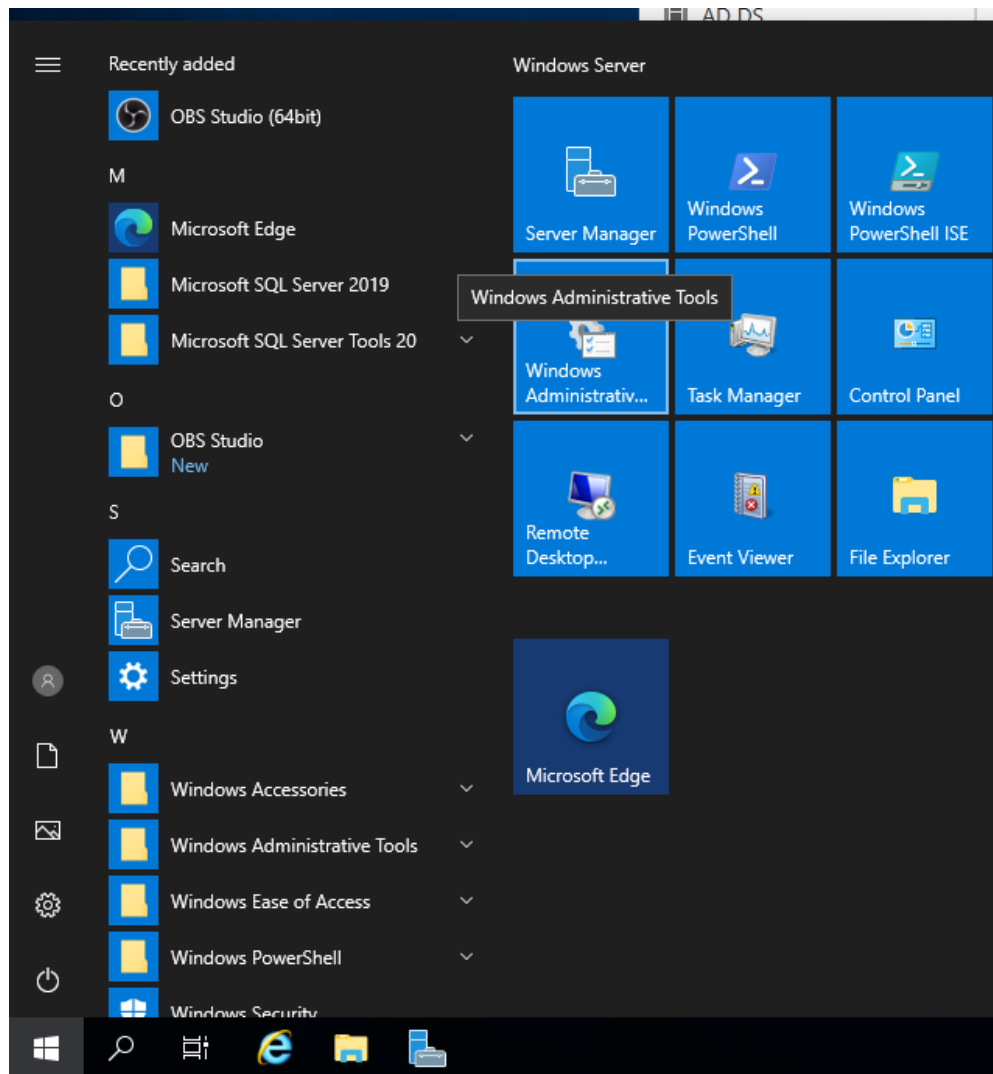

1.2 You will now remotely connect to the virtual machine

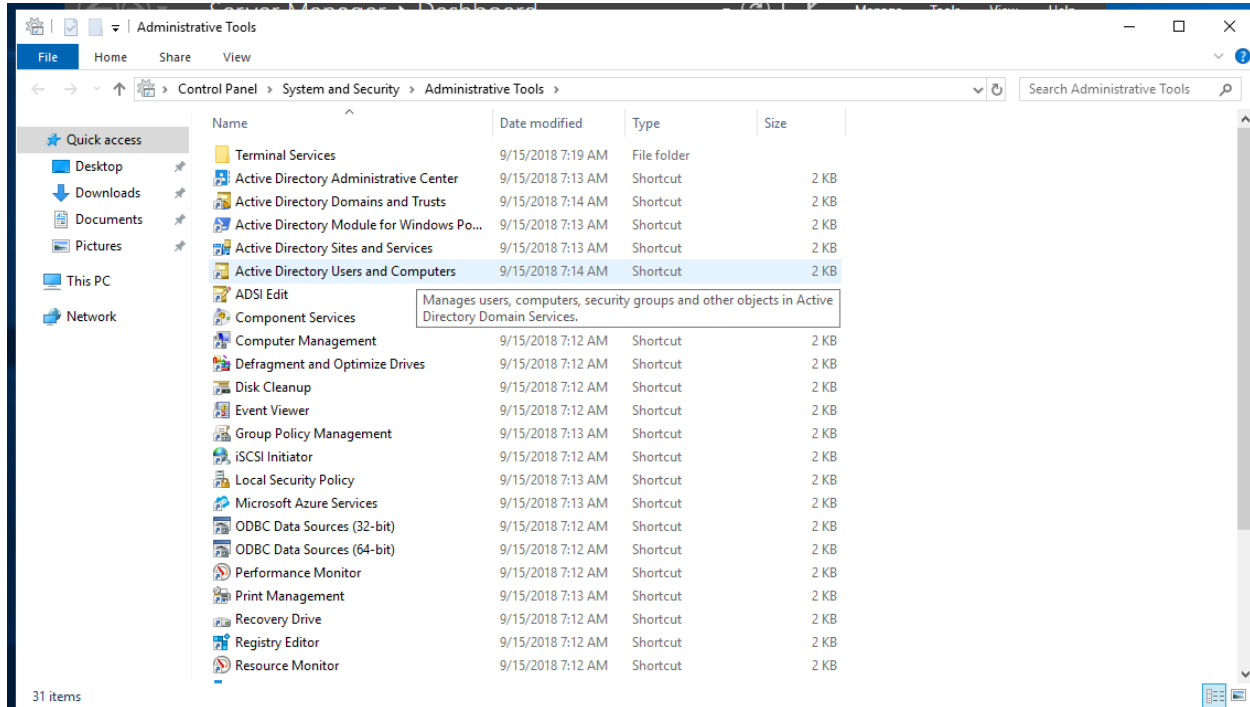

1.3 You will see this screen

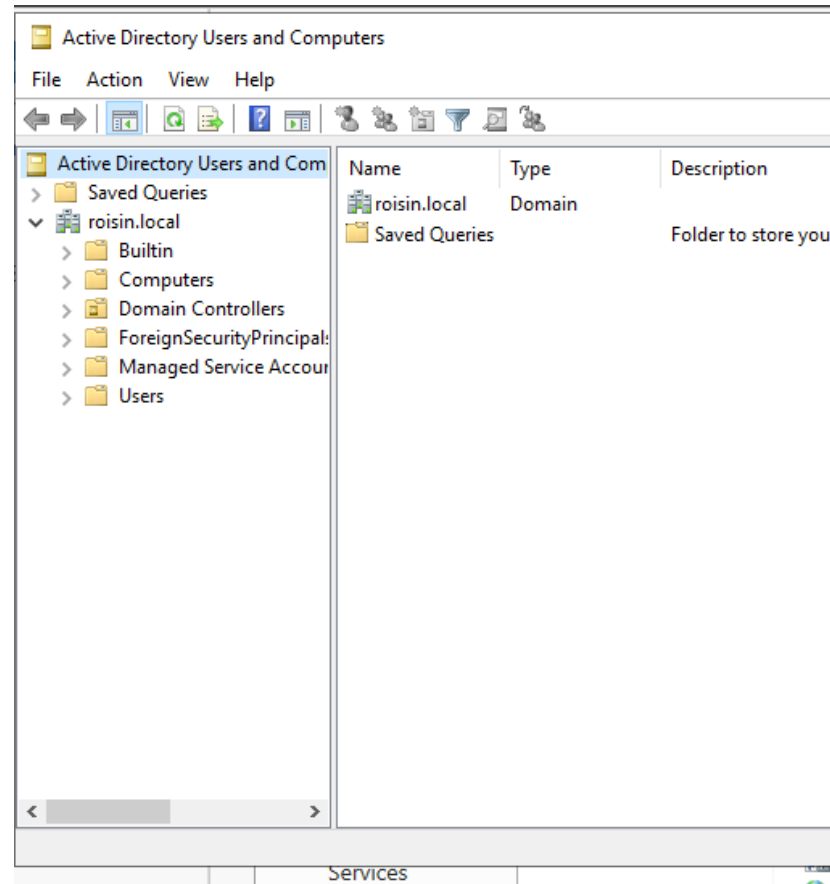

2. Go to administrative tools -> Active Directory Users and Computers

3. Users -> new -> user

4. Add details similar to the below screenshots but with your details:

Task1: What details are you adding here?
